<input type="checkbox"/> Regulator	<input type="checkbox"/> Fin (size:)
<input type="checkbox"/> Snorkel	<input type="checkbox"/> Bootie (size:)
<input type="checkbox"/> Mask	<input type="checkbox"/>

PLEASE READ: Diving is an exciting and demanding activity. When performed correctly, applying correct techniques, it is very safe. To scuba dive safely, you must not be extremely overweight or out of condition. Diving can be strenuous under certain conditions. Your respiratory and circulatory systems must be in good health. All body air spaces must be normal and healthy. A person with heart trouble, a current cold or congestion, epilepsy, asthma, a severe medical problem, or who is under the influence of alcohol or drugs should not dive. If taking medication, consult your doctor and the instructor before participation in this program. You will also need to learn from the instructor the important safety rules regarding breathing and equalization while scuba diving. Improper use of scuba equipment can result in serious injury. You must be thoroughly instructed in its use under direct supervision of a certified instructor to use it safely. I understand and agree the above statement.
